The AhaBulb Party Game

STUFF EVERY WORLD TRAVELER SHOULD KNOW

How to play (30 seconds)

1. The reader reads a card and its three answers out loud.
2. Everyone says "One, two, three, Goldilocks!" and holds up 1, 2, or 3 fingers.
3. The reader flips the card and reads the answer and the Why.
4. Everyone who was right takes a point.
5. The reader reads the joke with a straight face. Anyone laughs or groans? The reader takes a point. Nobody got it right? The reader takes a point.
6. Pass the deck left. Most points when the points run out wins.

What you need

These cards and the point tokens on the last two pages. No tokens? Use coins, buttons, pebbles, or marshmallows. 3 to 10 players, ages 8 and up.

Expert rule: Bet It

Before the reader flips the card, you may put one of your points on your answer. Right: take your normal point plus one extra. Wrong: your bet goes back to the pile. That's it.

Printing

Print single-sided, on cardstock if you have it. Cut on the dashed lines. Each card is a 3.5 x 5 inch index card. The answer half is upside down on purpose, so the table can't peek.

Cards 1 to 50 of 103. More cards and the free daily online game at sesk.info. Built 2026-10-14.

A foreign card terminal offers to charge you in US dollars. What should you usually select?

- **A** US dollars
- **B** Local currency
- **C** Either, if the card is new

FLIP FOR THE ANSWER

B Local currency

WHY If you pay in your home currency, the shop does the conversion and extra fees often make it more expensive. Paying in the local currency is often the cheapest option.

STRAIGHT FACE
I always pay in local currency, because letting a machine pick the rate is like letting a seagull choose your chips.

- **A** A higher annual fee
- **B** A bigger cash advance limit

C Low or no foreign transaction fee

WHY Some cards add a foreign transaction fee to purchases made abroad. On a long trip those charges add up, so check your card's terms before you go.

STRAIGHT FACE
I tried to tip in Japan and the waiter returned it faster than a boomerang with a receipt.

- **B** 230 volts
- **C** 240 volts

FLIP FOR THE ANSWER

B 230 volts

WHY Britain's nominal mains power is 230 volts at 50 hertz. Before plugging in a US appliance, check that it is rated for that voltage.

STRAIGHT FACE
British sockets run on 240 volts, which is how charged up I get when my bag comes out first.

SESK.INFO #9462

TRAVEL

What voltage do wall outlets supply throughout Japan?

- **A** 230 volts
- **B** 100 volts
- **C** 240 volts

FLIP FOR THE ANSWER

B 100 volts

WHY Japan's power is 100 volts AC across the whole country. Some appliances need a step-down transformer, so check the label before you plug in.

STRAIGHT FACE
Japan runs on 100 volts, which is still more energy than I have after a 14 hour flight.

SESK.INFO #9460

What does Britain's standard Type G plug look like?

- **A** Two flat parallel pins
- **B** Three rectangular pins

FLIP FOR THE ANSWER

B Three rectangular pins

WHY British plugs have three rectangular pins and a fuse inside the plug. A US plug won't fit, so you'll probably need an adapter.

A Type G plug looks sturdy enough to survive a London bus ride, because it often has to.

SESK.INFO #9461

In Britain, what should you check on a restaurant bill before adding a tip?

- **A** Whether a service charge is already added
- **B** Whether the waiter is new
- **C** Whether the menu has photos

FLIP FOR THE ANSWER

A Whether a service charge is already added

WHY Some British bars and restaurants automatically add a tip or service charge to the bill. Tipping isn't required there, but it is polite if the service was good.

STRAIGHT FACE
Service included means your tip should be a smile, not a subtraction from your vacation.

A charger labeled 100-240 V usually needs what extra gear to work abroad?

- **A** A voltage transformer
- **B** Just a plug adapter, if the plug won't fit
- **C** A second battery

FLIP FOR THE ANSWER

B Just a plug adapter, if the plug won't fit

WHY A 100-240 V label means the device handles both low and high mains voltage. Japan's tourism board notes dual-voltage hair dryers, irons and shavers work anywhere in Japan.

STRAIGHT FACE
100-240 V means the charger is bilingual in electricity.

- **A** Saved offline maps
- **B** Automatic downloads

STRAIGHT FACE
I turned off automatic downloads abroad, and my phone bill finally stopped sightseeing.

FLIP FOR THE ANSWER

C A local SIM card or eSIM

WHY Ask your carrier to unlock your phone, then use a local SIM card or eSIM with a local number. Your phone must also work on the networks where you travel.

STRAIGHT FACE
A local SIM is like buying a local hat: you fit in and your data stops crying.

- **C** 7 May 2026

FLIP FOR THE ANSWER

A 5 July 2026

WHY Australia writes numeric dates as day/month/year, while the US uses month/day/year. Check tickets and bookings carefully, because the same numbers can mean different dates.

STRAIGHT FACE
Zero Celsius means water freezes, but my enthusiasm for pizza never does.

- **A** 7:30 pm
- **B** 7:30 am

FLIP FOR THE ANSWER

A 7:30 pm

WHY The 24-hour clock numbers the hours from 00:00 at midnight to 23:59. For times after noon, subtract 12 to get the pm time, so 19:30 is 7:30 pm.

STRAIGHT FACE
I told my friend 19:30 and she asked if that was the flight number or the price.

A Westward
B Eastward
C Northward

FLIP FOR THE ANSWER

B Eastward

WHY Flying east means your body clock has to move earlier, and most people find that harder than moving it later. Westward trips are usually easier to adapt to.

STRAIGHT FACE
Flying east made my watch go forward and my sleep go backward.

SESK.INFO #9474

What causes jet lag?

A A mismatch between your body clock and destination time
B Motion sickness from turbulence
C Low cabin oxygen

FLIP FOR THE ANSWER

A A mismatch between your body clock and destination time

STRAIGHT FACE
My body clock is still on island time, which is fine until the meeting is on Monday time.

B BST
C UTC

FLIP FOR THE ANSWER

C UTC

WHY Coordinated Universal Time runs at the rate of atomic clocks and took effect internationally in 1972. Local time zones are often written as offsets from it, such as UTC minus 5.

UTC is the time zone for people who think local time is too emotional.

A 12
B 24
C 36

FLIP FOR THE ANSWER

B 24

WHY Earth was divided into slices 15 degrees of longitude wide, giving 24 zones for the 24 hours of one rotation. Countries draw their own borders, so real zones are not straight lines.

STRAIGHT FACE
Thanks to time zones, I once landed before I took off, and I still missed lunch.

SESK.INFO #9471

What over-the-counter supplement may help some travelers manage jet lag?

A Melatonin

B Vitamin C

C Iron pills

FLIP FOR THE ANSWER

A Melatonin

WHY Melatonin is a hormone your brain makes in the dark. A small, well-timed dose can help shift your body clock, but ask a health provider first.

STRAIGHT FACE
Melatonin and I have a deal: it helps me sleep, and I stop counting time zones instead of sheep.

What environmental factor is key to resetting your body clock after flying?

A Full darkness all day

B Wind

C Light exposure

FLIP FOR THE ANSWER

C Light exposure

WHY Light helps sync your internal clock with the world around you. Getting light, or avoiding it, at the right times can shorten jet lag.
